

Mark Walter

A Male is a male. A Female is a female. A male claiming to be female is a mental not a biological issue. Male and Female are different biologically and those differences must be respected, and only like kinds should compete together.

Anne Keckler

It's very important that we be able to speak the truth without fear of censorship. Women deserve to be heard, and people who speak up for the rights of women deserve to be heard. People have a right to hear both sides of this issue.

Jane Foody

Please women are begging you not to censor and discriminate against us. If you remove a video of a boy beating a girl and a boy being in the women's locker room, you will be discriminating against women and censoring and bullying us. Being female is a biological reality it is not a costume, an outfit, a feeling, and identity or a performance. There is plenty of evidence when looking at global porn searches that trans. Identifying men are fetishizing being a woman and woman's oppression. All you need to do is look at Shae's law or look at any history book to see that men have oppressed women across the world for centuries and they have done so because of the biological differences and advantages that men inherently have. Taking hormones wearing clothes that are stereotypical of females Alice does not make a biological man a woman. It is scary and ridiculous that women are having to even send in our comments about this and that this is something we even are having to fight for. Men have barged and forced their way into women's single-sex spaces all over the world. There are over 1000 women that have lost prizes scholarships awards to biological men that pretend to be women. This is not happening the other way around, thus proving discrimination, inequality and unfairness. There is not one woman that has one and award that a man typically wins. There has been no female NFL player of the year. There has been no biological female that has won "best man" "best looking" or "most eligible bachelor". Yet biological men have taken those titles and prizes from biological women. There has been a rash of laws that have been pumped through governments all over the world, giving biological men the right to identify as women and thus invade our prisons, our locker rooms, our careers, our dating apps and more and these people are very litigious. Please, I beg of you to stand up for the reality of biological women and allow us our free speech. Biology is not bullying. Also, a woman is killed every minute where as only 323 transgender people were killed in the past year- 32 in the USA. It is a fallacy that there is some kind of transgenocide. Women are the ones being sold as slaves, trafficked, married off as young children and killed for being female all over the world.

Kristi Mitchell

Women should not have to beg on their knees for safe spaces, or be censored when we want to have our voices heard about how unsafe we feel!!

Maurice Loucel

“With all due respect

If a men can easily be a woman, then why a woman cannot defend herself?

Why remove their rights and impose a set of rights they never asked for.

Why remove the few rights they already own, and go back to an era where women’s rights were none?

What will be the next step.

Remove the word women/woman because is offensive?”

Joyce Taylor

Stop Erasing Women!

Nathan Pohlman

Meta, stop discriminating against biological women. A lot of women fought hard for rights that biological men are now trying to steal from them because they are marginal against real men in sports or have documented mental illness. My 2 daughters deserve better than you censoring their free speech.

Krista Ellingson

You’re losing market share to X by not allowing women to comment on their human right to sex-based, female only spaces.

Mark Hemphill

“Please refrain from any suppression of women’s rights. There is no right of men masquerading as women to the use of women’s spaces or sports. The rights of trans men do not trump the rights of women.

Suppression of women’s rights to express their discomfort with trans men in their spaces and sports devalues Meta’s claim to be a public forum and instead makes Meta into a publisher of content. If Meta persists in picking sides in affairs such as this, I will vote for representatives and support law that regulates Meta as a publisher.”

Joe Rigell

This oversight made me to delete my Facebook and Instagram accounts. Free speech should be free and unregulated. Who will regulate the regulators?

Patricia Garrison

“Let people speak and tell their stories and opinions without CENSORSHIP.

Thank you.”

Katherine Roddy

“Dear Sir or Madam,

I have spent many decades of my life fighting for equal rights for women. I graduated from high school before the enactment of Title IX, and the only girls’ sports team at my high school was a single volleyball team—we girls could not compete in track, swimming, softball, or any other sport. My younger sister was luckier—when she went to high school, she could actually compete in discuss and javelin. Now girls’ sports and women’s sports are threatened, and girls’ and women’s safety is threatened by the inclusion of males in their sports and their single sex spaces. I urge Meta to allow an open and respectful dialogue about this issue. Please don’t censor women’s voices for standing up for women’s rights.”

Greg Toebe

Males competing in Women’s sports is not right at all. If they want to compete in other than Men’s sports, start a trans sports category and let them compete there.

Cole HarriS

This is ludicrous. How about the bullying and harassment towards women? I am so sick of women being treated like we don’t matter or even exist. I will 100% abort anything meta related if this comes to fruition. And, make it my life’s purpose to have others join me .

Richard Mulkey

Stop censoring and allow people to debate this openly. We are capable of thinking for ourselves. Free speech is vital to this nation’s well-being.

Claire Newman

Meta please do not censor posts that advocate for women’s sports & spaces! It is vital for the safety of women and girls.

David Garvin

“Discussing biological sex is not discriminatory or hateful. There are answers out there as to how to deal with the challenges of these groups but censorship is not one of them.

Biological facts and scientific truths cannot be erased just to deal with an individual’s or group’s feelings.

People who are offended just need to learn to deal with their own feelings and not expect the rest of the world to change just for something as subjective as feelings.”

Juliet Gray

“To Whom It May Concern,

I am deeply troubled by any policy that would hinder sex-based speech on Meta Platforms. I believe that females must be protected through access to single-sex spaces and sporting opportunities. For me to express this belief does not constitute harrassment, and to label it as such is a free-speech violation. Meta’s credibility would be significantly compromised if it allowed censorship regarding to erode sex-based discussions.”

Adi Elliott

It is reasonable speech to want biological men out of women’s protect spaces. If you consider this “hate speech” or in any way censor this speech, you are supporting misogyny and attacks on women. The data says that “men who say they are women” are orders of magnitude more likely to be sexual predators. And men (who don’t say they are women) are order of magnitude more likely to be sexual predators than women. This is the data. And why it is important to allow people to speak out for protecting women.

Karl Flowers

“Trans women have no right to be in a women’s space. Videos by women who feel violated are completely acceptable on social media as much as trans people who feel violated. Of course a third bathroom for trans people is quite acceptable amd should be looked into.

Social media companies suppressing free speech should be boycotted. Most rans people are not advocates of free speech.”

Shannon Marques

As the mother of two teenage female volleyball players, it is appalling to me that Meta is considering taking a hard stance on biological men playing in women’s sports. The risk of injury if either one of my daughters were playing on a court against a team with a biological male is extremely high. There are stories & videos & facts & proof all over the internet substantiating this statement. Biological men SHOULD NOT be playing in women’s sports. Any company that would silence the mothers of the female athletes at risk of being injured should take a long, hard look at their policies (and personal morals).

Anna Angeline Angel Bakos

“Meta is imposing their views on the populace & the Fact checkers follow the philosophical views of the proprietor & any investors they

have. Meta is not worth my participation. Truth is not decided when there is known bias!

The TRUTH depends on:

- 1) Were you a witness to the incident!

- 2) Whatever you think you 'heard,' also depends upon how far you were from the person speaking
- 3) Do you have any hearing or viewing impediments
- 4) What biases characterize you?
- 5) What entities influence your pre-disposition?
- 6) Do you work for an entity that expects you to reflect a set of values?
- 7) Are you conscious of your own
- 8) Are you a mindful person—on the job or when on personal time?
- 9) Are you member of any groups who are apt to influence your thoughts & attitude?
- 10) Do you even search for information that provides opposing views?

All your answers should reveal whether you recognize the truth!

I do not value the views of sources that have a stake in the outcome of a situation or incident!

I do value 'facts' but reporters, writers, media agencies & government can no longer be depended on to express truths; how can a group of 'fact checkers' know the truth or recognize truth of any kind on any subject ?

The new AI is compounding ALL the above!

I will not be a participant of any source that seeks to correct me or restrict my access to a service or product!

Finally, many individuals & groups remain connected to Facebook & other social media because it benefits the goals of their business or group. These types have a 'vested interest' & a conflict of interest!

I will not allow any of these to prevent me from learning as much of the truth as I can find!"

Michael Jones

I support Trans rights and I support womens rights. Forcefully exposing women and children to biological males in bathrooms and locker rooms is a travesty against women's right's. Censoring anyone that feels this way is an injustice to the freedom of speech.

Neland Nobel

"I would argue there are two problems. One, Facebook would be following a fad that has no scientific basis. Just because I might assert I am Peter Pan does not mean I can fly. The mere assertion of feelings cannot change the fundamental differences between males and females.

Secondly, this is a matter of public dispute where opinions can vary. Democratic societies work out their difference through discussion and dialogue, not through censorship."
